Sarah's Intermediate Method Overview

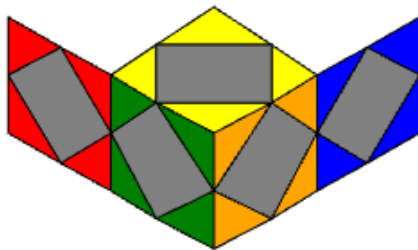

You are recommended to first read [Sarah's beginner method](#) page, if you are not familiar with beginner method.

Step 1: Solve the first side.

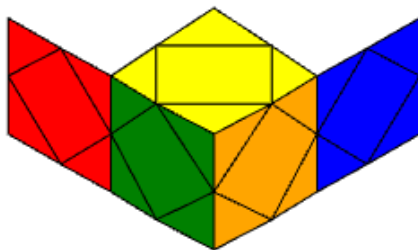

Step 2: Solve the opposite side (corners and opposite center).

Notice white center is already solved, but is not shown.

Step 3: Solve the remaining centers.

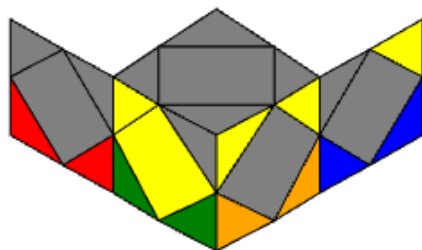

Sarah's Intermediate Method Algorithms

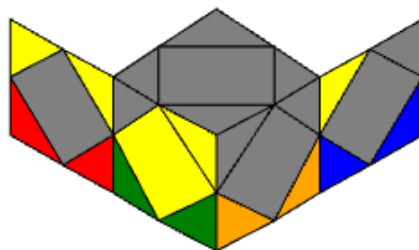

Tips: click on show notation above to understand the notations.

Step 1 is intuitive, step 3 is identical to [Sarah's beginner method](#) step 4 algorithms.

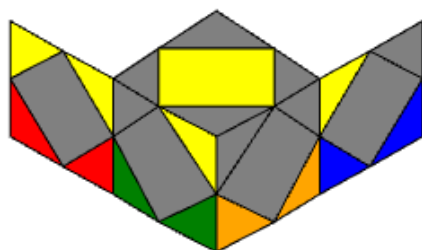

We list all step 2 algorithms.
